We strongly recommend that our students pay attention to the following remarks so that they can register in the 2021-2022 II. Term without any issues.

- If you will be in the 2nd semester for the master's program and the 3rd semester of the doctoral program as of the 2021-2022 II. semester, you must have completed your advisor assignment process in the program no. 71. Otherwise, the program will not allow you to register. It is enough to do this once.

- During the interactive registration, you must register for the course and have the approval of the advisor.

- If you do not get the advisor's approval, your registration will be considered incomplete, and the SYSTEM WILL NOT ALLOW YOU TO REGISTER DURING THE ADD-DROP PERIOD. It will not be registered with a petition.

- During the add-drop period, only students who have graduated from a master's degree are allowed to register for a doctorate program. If you have not registered in interactive registrations, registration will not be possible during this period.

In order to count the courses you have taken in the "NI" status while in the Scientific Preparation program, you must submit your petition until the start of add-drops in the program of your first semester. (With the petition and course substitution form available at http://iam.metu.edu.tr/en/forms).

- Master's program students with thesis can take IAM 590 "Graduate Seminar" starting from their 3rd semester.

- Doctoral program students can take IAM 690 "Graduate Seminar for Ph.D. Students" starting from their 3rd semester.

- Master's and doctoral program students with thesis; must code both 800/900 and 500/600 coded thesis study courses (500 and 800 for master's degree, 600 and 900 for doctorate) during each registration after completing the advisor assignment process in the program no. 71.

As per the graduate regulations (Article 17/8: At least one course including scientific research techniques and research and publication ethics must be taken during graduate education.), it is compulsory, for all students who start their master's and doctorate programs with or without thesis from the 2016-2017 academic year and on, to take the 9700698 “Research Methods and Ethics” course. This course must be taken as a MUST.

Those who want to switch from the non-thesis program to the thesis program can submit their applications with the ODTU extension e-mail until the pre-registration date, at latest March 4, 2022, in accordance with the information on our website (http://iam.metu.edu.tr/transferring-non-thesis-option-thesis-option-within-program). IF THEIR APPLICATIONS ARE ACCEPTED, THESE STUDENTS MUST REGISTER FOR 500/600 AND 800/900 CODE COURSES AT ADD-DROP TIME.

We wish you a successful term.
